TEAM CHARTER

Project: CCP-CN-S2026: Problem 2 – ISP Network **Date:** May 13, 2026

1. Team Mission & Objectives

Our mission is to design and implement a resilient triangle ISP topology for ConnectSphere. We aim to ensure 100% connectivity and a successful failover to the backup path within 60 seconds during a primary link failure.

2. Assigned Roles & Responsibilities

In accordance with the project requirements, the following roles are assigned:

Role	Member Name	Key Week 1 Responsibilities
Network Architect	Haris Ahmad Khan	Topology design in draw.io and IP addressing plan (.xlsx).
Security Engineer	Aqsa Farzand	Planning SSH access and basic device hardening.
Automation Lead	M. Sufiyan Imran	Setting up the GitHub repository and project environment.
Testing/QA Engineer	Danish Khuram	Creating the initial test plan and resource acquisition report.
Documentation Lead	M Saad Sami	Formatting the status report and document templates.
Project Manager	Noman	Scheduling meetings and completing the Risk Assessment Matrix.

3. Communication & Collaboration

- **Primary Channel:** Whatsapp
- **File Storage:** All deliverables and configs will be synced to our GitHub repository.
- **Meeting Schedule:** Every Tuesday at 5:00 PM via Google Meet.

4. Operational Rules

- **Submission Policy:** All individual components must be uploaded to GitHub 24 hours before the weekly deadline to avoid the 10% daily late deduction.
- **Quality Standard:** All GNS3 configurations must be verified for basic connectivity (ping tests) before submission.
- **Conflict Resolution:** Disagreements regarding design will be decided by the Network Architect; scheduling conflicts will be resolved by the Project Manager.

University Of Management And Technology

5. Signatures of Agreement

By signing below, we agree to perform our assigned roles and contribute to the team grade (70%) and individual contributions (30%) as outlined in the grading rubrics.

1. Noman (Project Manager)
2. Haris Ahmad Khan (Network Architect)
3. Aqsa Farzand (Security Engineer)
4. M. Sufiyan Imran (Automation Lead)
5. Danish Khuram (Testing/QA Engineer)
6. M Saad Sami (Documentation Lead)
